Programming Language HW-4 Report

I do all part but part 1 and part 4 has some trouble.In first part it can find alternative route but it can't find İzmir and other cities after than izmir and if you start in izmir it can not show cities after than İstanbul.İstanbul search take a little longer but it end and finds all alternative route.It not enter the infinite loop.

Part 2 and part 3 works correctly in my test.

In part 4, program checks equivalent and element but it can not check intersect and union part.
